Statutory Annual Corporate Governance Report, cf. Section 107b of the Danish Financial Statements Act

This Statutory Corporate Governance Report forms part of the management's review in the Annual Report for 2014, covering the period 1 January - 31 December 2014 and is prepared pursuant to Article 107b of the Danish Financial Statements Act. The report is based on the recommendations of the Committee on Corporate Governance (Komitéen for god selskabsledelse) and should be interpreted in accordance with the rules for companies listed on NASDAQ Copenhagen.

The current recommendations are found at: <http://www.corporategovernance.dk>

The Management believes that the Company is operated in compliance with guidelines and recommendations that support the Company's business model and can create value for Bavarian Nordic's stakeholders. Regularly and at least once a year, the Management monitors adherence to the recommendations on corporate governance in order to ensure the best possible utilization of and compliance with the recommendations and legislation. To the greatest extent possible, the recommendations have been incorporated in the Company's annual report and website.

Management of Bavarian Nordic

Bavarian Nordic is managed under a two-tier structure composed of the Board of Directors ("the Board") and the Corporate Management (Executive Board). The Board is responsible for the overall strategic management and the financial and managerial supervision of Bavarian Nordic A/S as well as for regular evaluation of the work of the Corporate Management. In addition, the Board supervises the Company in a general sense and ensures that it is managed in an adequate manner and in accordance with applicable law and the Company's articles of association

The work and composition of the Board

The Board discharges its duties in accordance with the rules of procedure of the Board. The rules of procedure are reviewed and updated by all members of the Board.

The Board consists of five external members elected by the shareholders at the annual General Meeting for terms of one year. Retiring members are eligible for re-election. In addition, such members that are to be elected pursuant to the statutory rules regarding representation of the employees on the Board shall be elected as well. Currently, the Board has no employee representation. The Board elects a chairman from among its members.

The following members were elected to the Board at the annual general meeting in 2014:

- Gerard van Odijk (Chairman)
- Anders Gersel Pedersen (Deputy chairman)
- Claus Bræstrup (Member)
- Peter Kürstein (Member)
- Erik G. Hansen (Member)

In 2014, the Board held nine meetings. Corporate Management and certain senior employees of Bavarian Nordic usually attend the Board meetings. The Board regularly receives reports from Corporate Management on the status of the Company's operations and business. The Chairman of the Board and the Company's legal advisor evaluate the performance of the Board and Corporate Management on an annual basis. The result is presented to and discussed by the Board.

Practices of the Corporate Management

The Corporate Management is responsible for the day-to-day management of Bavarian Nordic A/S in compliance with the guidelines and directions issued by the Board. The day-to-day operations do not include transactions of an unusual nature or of material importance to the affairs of Bavarian Nordic A/S

Members of the Corporate Management are appointed by the Board which lays down their terms and conditions of employment and the framework for their duties.

Corporate Management consists of the following members:

- Paul Chaplin, President and Chief Executive Officer
- Ole Larsen, Executive Vice President and Chief Financial Officer

Risk Management

Risk management is an integrated part of Bavarian Nordic's operations. Material risks that could affect the Company's work, future performance or goals, or the interests of the shareholders are identified with the purpose of running the Company in accordance with best practice in the Company's area of business.

In order to fulfil these objectives, the Company has set up internal systems for this purpose. Furthermore, external advisers assist in the constant assessment and updating. All relevant departments participate in the identification and assessment of risk factors in order to address them properly. The Board regularly receives reports on these initiatives, which then form part of the Board's overall assessment and decisions about the Company's activities and future.

In 2014, the Company increased its robustness and thereby decreased the risk in the production through implementation of a variety of changes throughout the entire production process. The Company also focused on recruitment in the Phase 3 trial of PROSTVAC and the enrollment target of 1,200 patients was reached in December. The primary risk to the revenue in 2014 was related to the production and deliveries of IMVAMUNE to the U.S. and thus an important point of focus.

The primary risks in 2015 relate to the continued tech transfer of PROSTVAC, production and deliveries of bulk drug substance of MVA-BN Filo to Janssen and the recruitment of patients for the Phase 3 trial of IMVAMUNE.

Risk factors

Expectations and assumptions in the annual report concerning Bavarian Nordic's business - the market for vaccines against smallpox, Ebola, cancer and infectious diseases - and Bavarian Nordic's revenue, accounting results and expected market share are subject to substantial uncertainty. There is no guarantee that Bavarian Nordic will wholly or partly achieve its expectations for revenue or the profit/loss for the year. The major short-to-medium-term uncertainties include but are not limited to the following:

- Securing new IMVAMUNE delivery contracts with the U.S. Government
- Securing IMVAMUNE/IMVANEX contracts with other governments
- Recruitment of patients for the Phase 3 trial of IMVAMUNE
- Continued improvements in production of IMVAMUNE
- Preparations for commercial manufacturing of PROSTVAC and commercial manufacturing of MVA-BN Filo at the Kvistgaard facility including validation of the production unit
- Collaborative agreements
- Changes in the US dollar exchange rate and how it affects the free liquidity, future revenue and net finances
- Bavarian Nordic's subcontractors
- Duration of review processes by various authorities

- Protection of patents and other intellectual property rights
- Clinical development
- Risks relating to Bavarian Nordic's technologies, projects and products
- The ability to retain key personnel
- Tax risks
- Risks related to IT in general including protection against attempts to intrude firewall and servers
- All staff is performing according to the Company's Standard Operational Procedures and Policies in order to reduce risk for production and delivery failures as well as fraud or other losses

Bavarian Nordic's operational risks further include the ability to enter into collaborations with partners for development, manufacturing, marketing and financial resources. There are additional risks related to sales contracts and the related production and logistics.

Currency risks include the risk arising from sales and production contracts being denominated in currencies other than Danish kroner. Contracts are primarily in U.S. dollars, so other currencies do not represent significant currency risks. The exposure from fluctuations in the U.S. dollar is increased because a significant part of the exposure relates to an internal U.S. dollar denominated loan between the subsidiary in California and the parent company in Denmark. This internal loan is not hedged. Liquidity can be influenced by changes in the USD/DKK exchange rate, in that profit or loss from the currency contracts can be settled when the contracts are due for extension. As long as the DKK is linked to the EUR the Company's revenue and costs in EUR will not be hedged.

Bavarian Nordic has a strong intellectual property position; however, due to the complex legal issues in this area, there can be no assurance that Bavarian Nordic can successfully defend the validity of its patents or oppose infringement claims.

Delays or intervention by the authorities in current or future clinical trials could also have a substantial impact on Bavarian Nordic's operations and financial position.

Internal Control

Financial reporting process

The Board and the Management of Bavarian Nordic are generally responsible for the Group's control and risk management in connection with the financial reporting process, including compliance with rules and regulations that are relevant in reporting.

Bavarian Nordic has an audit committee consisting of the Company's Board members and chaired by Erik G. Hansen. The committee reviews and discusses the accounting and audit practices with the Company's auditors elected at the Annual General Meeting and the Corporate Management in accordance with the working framework of the audit committee.

Bavarian Nordic's main focus is to ensure that its financial statements are in compliance and give a correct and reliable view of the Company's operations and financial position.

Bavarian Nordic has policies and procedures for key areas of financial reporting as well as work plans for the month-end closing process, ensuring that all relevant reconciliations are prepared and reviewed and that records coding is in accordance with the requirements and guidelines that the U.S. authorities have in relation to covering project costs.

Monthly closing procedures ensure an in-depth analysis of deviations between actual performance, business plans and budgets, and updated estimates for the financial year. A written monthly management report is prepared by each division containing explanations for deviations in the central business areas within the division.

The division reports are combined into one group report that is distributed to the Executive Management monthly and to the Board quarterly. In non-quarterly months the Board receive an executive summary.

Internal controls

Each division has its own accounting and controller function which is responsible for the division's monthly closing process and reporting to corporate finance.

Financial planning, follow-up and reporting is supported by a group reporting system that shows actual and budgeted financial figures down to the department

and account level. All budget holders have access to the group reporting system, which is updated daily with direct links to the Group's ERP system.

The quarterly financial reporting is prepared by group finance based on input from each division's accounting and controller functions. Where considered relevant, key risk areas are reviewed by the auditors.

The annual audit and reporting process includes detailed planning of individual tasks and planning meetings between investor relations (IR), group finance and the auditors, and it is based on an audit strategy approved by the audit committee.

Risk assessment

At least once a year, the Board evaluates the risks connected with the financial reporting process, including the presence of internal controls and guidelines. The Board assesses the Group's organizational structure, including the risk of fraud and the measures to be taken to reduce and/or eliminate such risk. In that regard, any incentive or motive from the Corporate Management to manipulate earnings or perform any other fraudulent action is discussed. The Group's internal controls and guidelines provide a reasonable but not absolute certainty that unlawful use of assets, loss and/or significant errors or deficiencies in relation to the financial reporting process can be avoided.

The Board has decided not to institute an internal audit at Bavarian Nordic, based on its assessment that the Company's size and complexity does not necessitate such a function.

Control environment

Information technology and computerized systems are widely used in almost any area at Bavarian Nordic. Several processes are automated and key decisions and actions are taken through electronic interfaces. In the ERP system, a number of user groups have been set up to ensure the required segregation of key functions in the finance department. Incoming invoices are approved electronically, and an approval hierarchy ensures that invoices are approved by the appropriate persons and according to the proxy rules of the Group. Payment proposals are approved through online banking and always by two staff members jointly.

The business procedures in the IT department ensure that all IT development is according to GLP, GCP and GMP. There are effective procedures for identifying, monitoring and reporting IT risks and security measures set up to respond to emerging events.
